

Graduate Assistantship Job Description

Applicants restricted to only those who have obtained a bachelor's in Computer Science, Information Technology, Media & Entertainment or Engineering

Experience with WordPress, web applications and web development/coding. Core Knowledge of HTML, JavaScript, PHP, and SQL.

CEM supports educator training in the College of Education by offering expertise and services - in AVS Production, AVS Media Engineering-Equipment Checkout and professional learning opportunities in the CEN Professional Development Center including the PK-12 Collaborative. CEM's high quality production and range of services are unique in Tennessee's Educator Preparation Programs. Offering full conference coordination services for virtual and onsite events, including state of the art HD video production, CEM takes educator training and professional development to another level. No other university in Tennessee offers this level of support to educator training. Our educational outreach includes local, state, national and global communities of educators via distribution through the web, satellite, and cable TV.
